
unable install export content in mambo 4.5.2

Posted by guarez - 2008/02/22 17:56

hi.. i download the component "export content 2.0" .. the instalation process in my joomla 1.5 work ok, but in my old mambo, dont work..

i get "Restricted access" when i install it

Any help?

You need to install Export Content version 1.0.0 stable which has been written for Mambo. and is for Mambo 4.5+ and 4.6+ series sites.

And on the Joomla 1.5+ series sites you need to install Export Content 2.0.0 stable. And on Joomla 1.0+ series sites you need to install Export Content 1.7.0 stable. :)
