
Excellent Component

Posted by FidelGonzales - 2006/12/06 05:27

Steve,

Thank you again for the component!!! I'll keep you posted on the progress of that last modification you provided for the purpose of exporting content by section.

Until then,

Fidel

Hi Fidel

I will try and get the next release out early in the new year.

If all goes to plan you should be able to compile by section and also after importing the data you will be able to transfer multiple sections while still maintaining the original site structure.

And thanks for your continued feedback it is most appreciated :)

All above details have been addressed in Beta 1.5 release

Full details here:

It's been a while since I've checked in with the progress of the component. Glad to see there has been some progress made with new features and bug fixes. I'll put version 1.6 to the test now and report back.

Now we need a newsletter up so we can remain aware. Let me know if you need help with anything - even the site.

Thanks again.

Hi FidelGonzales

It's been a while since I've checked in with the progress of the component. Glad to see there has been some progress made with new features and bug fixes. I'll put version 1.6 to the test now and report back.

Now we need a newsletter up so we can remain aware. Let me know if you need help with anything - even the site.

Thanks for the support and offer.

I've just about finished an information site for the component with screen shots etc.

Should be up over the next few days.

I'll post a link here when it's live so you can let me know what you think. :)

Also a newsletter that might be a good idea :idea:

For the newsletter, PHPBB should work for registered users. Otherwise, something such as Acajoom for a Joomla based solution works well and easily imports emails for emailing those sites interested in the latest Joomla info.

Otherwise, something such as Acajoom for a Joomla based solution

Yes I think if we are going to have a newsletter Acajoom would be the way to go.
