export content crashes

Posted by Breathwork - 2007/05/03 18:24

---

using 1.6a

when i click on export content I get the following message:

SQL=mos_mos_mos_mos_mos_mos_mos_mos_mos_mos_mos_mos_mos_mos_mos_mos_mos_mos_mos_mos_mos_mos_mos

Hi Geoffrey

Can you give me more details.
Looking at the error it looks like it must be a mambo install.
If so it maybe the version you are using.

But I would only be guessing without more information.

Right!

It is Mambo 4.5.2

Geoffrey

Hi Geoffrey.

Is this when you click on export content in the "admin menu" or on the left in the "export content menu"?

I'am not sure but I think it has been successfully used on Mambo 4.5.2 before so it may be a corrupted file.

You could try uninstalling and reinstalling Export content.
and check that there have been no core hacks on the mambo install.

Also check that the MySQL Database Prefix is "mos_" under global configurations.
